The following is an examiner's statement of reasons for allowance: With regard to Cheng (US 6,291,593), newly cited, Cheng provides no teaching or suggestion of a composition having a compound having an unsaturation index of at least about 500 in combination with an adhesion promoter much less a composition having a compound having an unsaturation index of at least about 500 in combination with an adhesion promoter which has applicants' specific peak exotherm characteristic (as defined by applicants' specification) . While Cheng may arguably suggest that the peak exotherm characteristic is result effective for Cheng's purposes, Cheng merely wished to avoid exotherms so great as to warp plastics and in no way suggested a composition capable of the low peak exotherm of applicants' claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
